

**Flight Training** - Welcome to the only flight school in the southeast with both fixed-wing and rotor-wing training. Whether you are brand new to the flying community or an experienced pilot wanting to broaden your horizons, we are excited to offer first-rate and affordable instruction to all the upstate.

**Fixed-Wing Training** - If you have no experience in any aircraft, we recommend starting in a fixed wing such as our Cessna 172 or 150. Depending on your aviation goals, you can start with your Private Certificate, then Instrument Rating, and later, Commercial Certificate. Start flying for a career or a hobby today!

**Rotor-Wing Training**- Only 1 out of every 30 pilots is licensed to fly a helicopter. If a helicopter rating is something you would be interested in, then you came to the right place. Whether you want to hover for fun or for a career, our experienced staff can assist you in making those goals a reality.

**Call Now!** If you want to enroll in our program, ask any questions, or set up a discovery flight, give us a call or email anytime.

**5805 Airport Road, Anderson, South Carolina 29626    864-720-3163**
