The Road Index (below) lists every road in the county according to the Anderson County Department of GIS & E911 Addressing's current database (June 2017). The Major Grid Maps that follow this index are in order from 01 to 47. The number beside the road shows the map(s) on which the road can be found.

Each of the 47 individual maps has its own index, minor index. The minor index for each map is located to the left of the actual map, on the back of the previous map. The major index lists each road on the map, and the grid number (if available) also indicates the location of the road and spacing of other labels; however, a road that is not labeled on the map(s) will still be listed by its location in this index. Using these indices, a road's location, whether labeled or not, can be found on the map within 1/2 mile.
